♥ Shiraz, Fars, Iran

Profile Summary

Junior self-taught programmer who loves coding, is interested in working with a professional team, and is looking to advance in the front-end field.

Education

Diploma in Computer

Branch: Software

Institute/School: Bahonar University

Shiraz, Fars, Iran

Since 2020

GPA : A

Projects

Kareto

Karto is a one-page web application that helps us manage weekly tasks, among its capabilities we can mention creating tasks with dates and reminders, creating accompanying notes, calendaring events and creating separate projects. To make the card, I used React js and Bootstrap on the front end, Node js and Express on the back end, and MongoDB for the database.
